

08/07/24 – (18:30 – 20:30). I chose a site to offer several routes from the Capel St. Mary start (20.6 km / 263) with little running on site needed (plus easy Tx collection) if heavy rains came. There was plenty of space for cars where I parked and **if you chose the correct entry** a short walk to both Tx's. However, DFers rarely do what you expect! Antenna ¼ wave, shoulder height through plant stalks, broadside to start on top of a bank in the old quarry, looking down on the searching of trees going on below from 7:30 pm.

Main Tx **A** Getaway Tx **G** My car **C** Hunters parked cars at **H**, I wonder who started the trend?

**Essex 4 2024**
